The solar PV system is installed free of charge, with no hidden costs, whilst you gain free of charge electricity.

The system will be fully supported with maintenance contracts, insurance and shall be installed by qualified MCS installation teams.

Properties must be South, South East or South West facing, have no shading, be able to fit at least a 2kWp (15m²) system on a structurally sound roof and must have consent by the property owner.

The Feed-in Tariff (FIT) and PV solution remain the property of Stroma.

Simply contact Stroma Solar today on

0845 621 11 16 and we will arrange for an approved surveyor from the Stroma Network to discuss this offer further and produce a detailed assessment.

Further information is available at www.stroma-solar.co.uk/pv4free where you will discover frequently asked questions, installation case studies and assurance of Stroma Solar's capabilities and vision.
